Sprint Burndown

Legend: Actual Burndown, Ideal Burndown

The burndown chart aligns closely with the Trello board tasks, reflecting the progress of the sprint. The chart starts with 5 user stories, as listed in Trello, including "Get User Location (S20-1)," "Sort Spots Based on Location (S20-8)," and others. Completed tasks in Trello, such as S20-1 (1/1) and S20-8 (2/2), correspond to the significant drops in the actual burndown line on the chart, particularly around Nov 26th and Nov 29th. Meanwhile, incomplete tasks like S20-6, S20-11, and S20-3 align with stagnation points on the chart, specifically between Nov 27–28 and Dec 1–3. The chart provides an adequate representation of the sprint's progress, highlighting early gains, mid-sprint recoveries, and a final catch-up effort to complete all tasks by Dec 3rd. This analysis reflects the progress recorded in Trello, ensuring transparency and consistency in tracking the sprint.
